WICHITA · PHYSICIAN-LED AESTHETICS

Bollywood Glow Facial · Carbon Laser Peel

ABOUT YOUR TREATMENT

The Bollywood Glow Facial

A laser carbon peel — also called a Hollywood peel or charcoal laser facial — that gently exfoliates and rejuvenates the skin for an instant, radiant glow.

HOW IT WORKS

- A thin layer of carbon (CO2) paste is applied to the skin.
- The **InMode PicoFY™** laser targets and heats the carbon particles, vaporizing them and lifting away dead skin cells, impurities, and bacteria.
- This controlled micro-exfoliation stimulates your skin to produce fresh collagen and elastin.

BENEFITS

- Reduces acne and blackheads
- Improves skin texture and tone
- Tightens and refines pores
- Softens fine lines and wrinkles
- Brightens a dull complexion

WHAT TO EXPECT & AFTERCARE

Your Glow, Cared For

YOUR PROCEDURE

- The treatment takes about **30 minutes**.
- You may feel a mild tingling or warm sensation during treatment.
- Afterward, skin may look slightly red or feel mildly irritated — this settles quickly.

AFTERCARE

- Avoid sun exposure and wear sunscreen for several days.
- Use gentle cleansers and moisturizers.
- Avoid harsh chemicals or exfoliants until skin has calmed.

Glow instantly in one session.

For lasting, camera-ready results, ask about a series of 4–6 (every 2–4 weeks).
